Clutch Components

Criteria:

- Identification
- Completeness
- Mechanical damage
- Corrosion

Clutch pressure plate

Clutch disc
RETURN CRITERIA

Clutch disc

Criteria:

Identification

Brand must be legible on the part

Acceptable

Acceptable
Clutch Pressure Plate

Criteria:

Identification

Brand must be legible on the part (see exemplary picture).
Clutch Disc

Criteria:

Completeness

Acceptable with
- missing torsional damper springs - if hub is not broken
- missing friction material

Acceptable

Acceptable
Clutch Pressure Plate

Criteria:

Completeness

Pressure Plate is acceptable if releaser is missing, no need to dismantle it.

Acceptable
RETURN CRITERIA

Clutch Disc

Criteria:

Mechanical damage

Not acceptable if
- clutch disc is bent or broken
- hub is broken
- damper is broken

Not acceptable

Not acceptable
Clutch Pressure Plate

Criteria:

Mechanical damage

Not acceptable if

- Cover is broken or distorted
- Diaphragm is broken or worn

Not acceptable

Not acceptable
Clutch Disc

Criteria:

Corrosion

Slight corrosion is acceptable, heavy corrosion is not acceptable

Not acceptable
### Clutch Pressure Plate

#### Criteria:

**Corrosion**

Slight corrosion is acceptable, heavy corrosion is not acceptable
Clutch Disc

Additional information

Not acceptable if it has blue metal through overheating
